Hi Carmen - the document Ms Macias is referring to is a HQ SPCC Guidances document. I can answer her Questions or we can refer her to HQ? The facility is covered under two different prevention rules (SPCC & RMP) that apply at different times.

Subject: Press Inquiry from KHOU deadline today

Good afternoon David,

In light of the tank fire in La Porte, I'm trying to make sense of tank inspection guidelines found here: https://www.epa.gov/sites/production/files/2014-04/documents/7_inspectionevaluation_testing_2014.pdf Can you answer a couple questions for me:

1. Is there a recommended age/lifetime of an aboveground storage tank? Same question for underground storage tanks.
2. This document refers to regional inspectors. Who inspects the tanks – trained personnel in the company, an outside company, EPA personnel or someone else?

Thanks,
Tina
